Inessa,

The timing of our project has changed and we will now be treating the areas in FPA #2815270 one to two weeks later than planned. I will update you as we get closer.

Best Regards,  
Kelly

Thank you, Kelly for kindly notifying us about upcoming herbicide spray. We very much hope that Weyerhaeuser reconsiders this herbicide application as it is going to take place close to a highly populated area consisting many families with children. It would be best for all parties if Weyerhaeuser uses non-chemical alternatives.

Hi Kelly,

Thank you for informing us all of this pending pesticide application. We would prefer that this application of herbicides not happen, and ask that Weyerhaeuser reconsider using other, non-chemical alternatives. If they go ahead with the spray, PLEASE communicate to your operator and all involved staff to take the utmost care to ensure that NO chemical relocates off target, by any possible methods (i.e. drift, runoff, leaching into groundwater, being washed downhill/downstream by rain, volatilization and condensation, etc...). Contamination of non-targeted lands and resources would NOT be acceptable. Thank you

We appreciate you informing the operator of the locations of all concerned citizens (in the valley AND in the areas near Cedar Ponds lake).

Please take wind speed and direction into consideration and stop applications if conditions change to become less than optimum.

Thank you for sharing our serious concerns with all relevant individuals. Sincerely, Diane Hardee

Dear Inessa,

We plan on treating the areas in FPA #2815270 at the earliest Sunday, September 4, 2016 and expect to be finished by Friday, September 9, 2016. I will notify you when the project is complete.

Best Regards,
